LEARN THE TOP 10 SCHOOL SUBJECTS IN ENGLISH. TRANSCRIPT

ART

Art usually refers to visual arts, such as painting, drawing, sculpture, etc, but in general, art can also include things like music and movies. For example, you can say, "I am an art major."

HISTORY

This is the study of past events. Usually, it involves a lot of facts, but it also involves thinking about why certain things happened. Here is a sample sentence, "You can learn a lot from history, as things tend to repeat themselves.". History always put me to sleep, but it is very important.

GEOGRAPHY

Geography is the study of the earth. It involves things like the names of countries and where certain places are, but it also includes information about the physical characteristics of places, such as mountains, rivers, oceans, etc. For example, you can say, "He is a geography major, with a minor in psychology.". I need to go back to school and learn my geography.

BIOLOGY

Some science subjects deal with chemical science, that is chemistry, or space science, that is astronomy. Biology is a scientific subject that deals with living things and how they work. Here is a sample sentence, "Biology is the study of living organisms."

CHEMISTRY

Chemistry is a very important science that focuses on nonliving materials and how the elements that everything is made of interact with one another. For example, you can say, "The laboratory is a place to learn about chemistry."

PHYSICS

Physics is the scientific field that deals with matter and how it moves. There is also a lot of attention paid to energy and how it affects its surroundings. For example, you can say, "I know the basics of physics.". And if you do, to me, you are a genius.

MATH

This is the study of numbers and how they affect each other. Here is a sample sentence, "My favorite subject in school is math.". You would never hear that out of me, and I am so glad that my cellphone has a calculator now.

COMPUTER SCIENCE

Computer science is the study of how computers work to perform tasks. It can also be used more generally to talk about the basics of computers. For example, you can say, "The field of computer science is relatively new."

PE

Physical education usually involves studying human biology and exercise. It is also sometimes called "P.E." when referring to it as a class. For example, you can say, "My least favorite class is physical education.", however, that was my favourite. Dodgeball, tennis, who can hate physical education?

ENGLISH

English is a language, but it is also the study of English language literature. Here is a sample sentence, "In English class, we have to read a lot of Shakespeare.". To be or not to be, that is all I remember.
