

## **TRIPPINN 10 HIDDEN GEMS IN NEW YORK YOU MUST SEE. TRANSCRIPT**

Hey everyone, welcome back to Trippinn. New York City is known for its towering skyscrapers, iconic landmarks, and bustling streets, but beyond Times Square and Central Park, the city is packed with hidden gems that most visitors completely overlook. From secret museums to scenic escapes, today we are diving into 10 must visit hidden spots in New York City that you will not find in your typical travel guide. Let us go.

First up, let us take to the skies with the Roosevelt Island Tramway. This hidden gem offers one of the most unique ways to see the NYC skyline. For the price of a subway ride, you can glide above the East River, taking in breathtaking views of Manhattan and Queens. Bonus tip, visit at sunset for an unforgettable experience.

If you love art and history, you have to visit the Cloisters. Located in Fort Tryon Park, this medieval style museum transports you straight to Europe. Inside you will find stunning tapestries, ancient sculptures, and tranquil gardens that feel worlds away from the city's chaos. It is one of NYC's best kept secrets for art lovers.

Step into one of the most beautiful libraries in the world, the Morgan Library. Once the private collection of banker JP Morgan, this library is now open to the public, featuring breathtaking interiors, rare manuscripts, and books dating back centuries. If you are a book lover or just appreciate grand architecture, this place is a must visit.

Want to experience what life was like for immigrants in the 19th and 20th centuries. The Tenement Museum takes you on a journey through restored apartments that tell the real stories of early New Yorkers with guided tours and interactive exhibits. This museum offers a powerful and emotional look into NYC's immigrant history.

Ground Zero Museum Workshop. Unlike the large 9/11 memorial and museum, the Ground Zero Museum Workshop is an intimate and personal experience. This hidden gem features rare artifacts, survivor stories, and behind the scenes images from the days after 9/11. It is an emotional but important stop for anyone wanting to understand the true impact of that day.

Looking for a peaceful escape in the middle of NYC. Head to Roosevelt Island. This quiet, scenic island offers stunning waterfront views, historic landmarks, and even the haunting ruins of an old smallpox hospital. Take a stroll along the riverside and enjoy a side of New York that most visitors never see.

Next, we are heading to the Frick Collection, a hidden gem for art lovers. This grand mansion turned museum houses masterpieces by Rembrandt, Vermeer, and Goya, all in an intimate, beautifully preserved setting. If you love art but want to avoid the crowds of the Met, this is the perfect spot.

Escape the city's chaos and step into the charming streets of the West Village. With tree lined roads, historic brownstones, and hidden speakeasies, this neighbourhood feels more like a European village than part of NYC. Wander around, grab a coffee at a cozy cafe, and soak in the laid back vibes.

Hidden in the Lower East Side, the Museum at Eldridge Street is a beautifully restored 19th century synagogue. Inside, you will find breathtaking stained glass windows and learn about NYC's rich Jewish heritage. It is a stunning and underrated piece of New York history.

Finally, let us talk about the Upper West Side, a neighbourhood that is often overlooked by tourists. This area is home to stunning architecture, classic bookstores, and cultural gems like Lincoln Center and Riverside Park. If you want a more relaxed, local experience in NYC, this is the place to explore.

And there you have it. Ten hidden gems in New York City that go way beyond Times Square and the Empire State Building.

## **VOCABULARY**
